EDUCATION

High School
Bornova Anatolian Highschool
September 2014 - June 2018
GPA 89.56

B.S
Computer Engineering
Izmir University of Economics
September 2019 - June 2023
GPA 3.10

CERTIFICATIONS

- The Ultimate Guide to Game Development with Unity - Udemy,2023
- Python for Machine Learning - Global AI Hub, 2022
- Tensorflow Bootcamp - Google Developer Group, 2022
- Flutter Bootcamp - Google Developer Group, 2022

LANGUAGES

English: Fluent
IEU Proficieny in English Exam: 95.6 / 100
YÖKDİL: 90 / 100
Spanish: Basic proficiency

SUMMARY

Results-driven software engineer with a passion for game development and a strong foundation in programming. Excited to start a career in game development and eager to find the opportunity to demonstrate my dedication and passion for creating memorable and unique gaming experiences. Skilled in C#, Unity Engine, and object-oriented programming principles, with an innovative and creative mindset. Throughout my life, playing video games has been a great source of joy for me. Looking ahead, I am confident that I will find that same level of enjoyment in the process of developing video games, with the belief that others will enjoy experiencing the games I create.

SKILLS

- Programming languages: C#, Java, JavaScript, TypeScript, Dart, Solidity, Python, SQL.
- Unity Engine as Game Development Engine
- Experience with Git version control System.
- Node.js for server-side development
- JavaFX for developing GUI in Java
- Gradle for build automation and depencency management
- Flutter for mobile app development
- Angular for web development framework
- MySQL for database management

WORK EXPERIENCE

Computer Engineer Intern

Izmir Chamber of Commerce
July- August 2022

- Successfully developed a dynamic and responive web page using Angular framework.
- Expanded knowledge and gained valuable work experience in various aspects of software engineering within a professional work environment.

PROJECTS

Druid's Tale

- Developed a 3D platformer-RPG game using Unity Engine, allowing player to transform into different animals to overcome obstacles and engage in strategic combat encounters.
- Utilized models and animations from Mixamo.
- Implemented a modern user interface.
- Integrated a boss encounter, with simple yet strategic mechanics.

Gun Run

- Developed a hyper casual mobile game called "Gun Run" in Unity.
- Implemented a gameplay mechanic where the player controls a moving gun on a platform, shooting obstacles with unique power-ups while collecting chargers to upgrade the gun.
- Created intuitive controls, allowing players to hold and drag the gun horizontally to avoid obstacles and strategically shoot at walls.
- Implemented randomly generated levels gradually increase the difficulty.
- Added banner and rewarded ads using Unity.

Putt Time

- Developed a 3D minigolf game similar to Discord's Putt Party.
- Added interactive shoot mechanics and unique obstacles for golf courses.

Decentralized Student Information System

- Created a decentralized student information system using blockchain technology. Key components included:
- Server : Implemented Node.js server to deploy smart contracts and interact with Solidity functions for blockchain data storage.
- Desktop Application : Developed a JavaFX-based desktop app for administrators and staff to access and manage student information stored in blockchain.
- Mobile Application: Built a decentralized mobile app integrated with Firebase and blockchain to enable convenient student access to blockchain-stored data.
